- Equipment assembly and maintenance, Local Networks, and Cybersecurity.

ABOUT ME

SMR Technician and current DAW (Web Application Development) student. A proactive and transparent professional with a solid foundation in web development and proficiency in using advanced AI tools (Prompt Engineering in Cursor) to streamline and scale project creation. I bring real-world technical experience: from hardware and network maintenance to building easily manageable websites for clients. My strong work ethic has been forged in customer service and the hospitality industry. I am looking to provide practical solutions, apply my adaptability, and continue growing professionally as an intern at 1xINTERNET.

EXPERIENCE

Freelance Web Developer

WebDavid.es | Present

Creation of websites for local businesses, including a self-manageable WordPress and Elementor site for a psychology clinic, giving the client total autonomy. Technical troubleshooting and creation of automation workflows using Make.com.

Software Developer (DAW Internship)

[Solba Informática](#) | May 2026

Exclusive development of "SolbaBackups", an in-house file synchronization and backup automation application for internal business use.

Database integration and use of Python for automation.

IT Support Technician

[Solba Informática](#) | March 2025 - August 2025

Repair, assembly/disassembly, and maintenance of computer equipment.

Local network setup (IP allocation, routing).

Configuration and support of specialized hospitality software (Hosteltactil).
